## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-5, 7-16 and 18-24, drawn to active tube with weights attached to an outer surface.

Group II, claim(s) 6-12 and 17-24, drawn to an active tube with a cylindrical thin film and balloon inflating channel.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The special technical feature of weights attached to the bending mechanism of the independent claims of Group I is not required in the independent claims of Group II. The special technical feature of the inflatable cylindrical thin film on the main tube with a balloon inflating channel of the independent claims of Group II is not required in the independent claims of Group I. Although both Groups I and II claim a common SMA coil in the working channel tube, by applicant's own admission in applicant's specification, the presence of an SMA coil in an active bending tube is commonly known in the art [applicant's specification, par. 0005], and thus is not considered the special technical feature of the claims. Applicant discloses that the addition of the weights [specification, pars. 0009-0010] and the addition of the cylindrical thin film [specification, par. 0013] are the special technical features intended to improve upon the SMA coil active bending tubes known in the art.

A telephone call was made to Scott Daniels on 11/17/09 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to VICTORIA W. CHEN whose telephone number is (571)272-3356. The examiner can normally be reached on M-F 8:30-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Linda Dvorak can be reached on (571) 272-4764. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
